Cold Filter Plugging Point Process Analyzer CFPP-4

Cold Filter Plugging Point Process Analyzer CFPP-4

To remain competitive, today's refiners must employ all optimization and product control techniques available. The use of online physical property analyzers is one of the key features to reach those objectives because they measure important quality properties in the process directly.

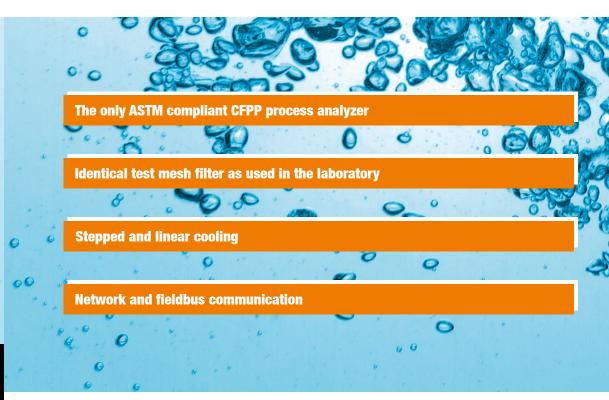

The cold filter plugging point (CFPP) is the lowest temperature at which diesel and domestic heating fuels will pass through a filter in a given time when cooled under certain conditions. CFPP is supposed to give an estimate for the lowest temperature at which these fuels will flow in fuel systems without problems. This temperature is important especially in cold temperature regions where high CFPP of diesel fuel could result in clogging up vehicles' fuel systems.

BARTEC BENKE

Your partner for innovative system solutions.

specialists have many years of experience. They create system solutions that you can rely on: efficient and dependable for decades to come.

APPLICATION

The BARTEC BENKE Cold Filter Plugging Point Process Analyzer CFPP-4 is a system for the fully automatic determination of the cold filter plugging point of diesel and domestic fuels. The CFPP-4 allows diesel fuel producers to optimize the use of cold flow additives that allows spreading the usage of winter grade diesel at temperatures below the cloud point. Besides the step-cooling procedure the CFPP-4 also offers linear sample cooling.

BARTEC BEN

Special Features:

- Visible function cycles by using a measuring cell made of plexiglass/glass
- Optimized assembly easy removal of complete cell
- No paraffin-adhesions on test mesh filter by flushing with preheated sample
- No correlative measurement, but exact reconstruction of cycles as described in **ASTM D6371**
- Identical test mesh filter as used in laboratory method
- Possibility to shorten cycle time by:
 - Switching between summer and winter setting
 - Reading cloud point value (if available)
- Integrated failure diagnosis and self monitoring
- Available communication interfaces:
 - Modbus/RTU, Modbus/TCP (bidirectional)
 - Remote access via Ethernet (VDSL or FOC is)
- Validation report for quality assurance
- Freely programmable digital and analog inputs

Norms and Standards:

Compliant with:

- **ASTM D6371**
- DIN EN 116
- IP 309
- **EN 16329**

Make your decision for a strong partner!

Choose BARTEC GROUP also for:

- Fast Loop Systems
- Sample Conditioning Systems
- **Validation Systems**
- **Recovery Systems**
- **Chillers**
- **Air Conditioning Systems/HVAC**
- **Pre Commissioned Analyzer Shelters/ Turn-Key Solutions**

Cold Filter Plugging Point Process Analyzer CFPP-4 BARTEC BE

EXPLOSION PROTECTION

ATEX: II 2 G IIC T4 Gb Marking

NEC 500: Class I, Div. 2, Groups B, C, D, T4 NEC 505: Class I, Zone 1, AEx IIB+H2 T4 CEC Sec. 18: Class I, Zone 1, Ex IIB+H2 T4

TECHNICAL DATA

Technology plugging sieve Method compliant with:

ASTM D6371, DIN EN 116, DIN EN 16329,

Measuring range -35 to 15°C (-31 to 59°F)

≤ DIN EN/ASTM Repeatability Reproducibility ≤ DIN EN/ASTM **Measuring cycle** discontinuous

25 to 90 min

depends on CFPP temperature **Product streams** 2 x sample, 1 x validation

(additional hardware required)

Electrical data

Nominal voltage 230 VAC ± 10 %, 1 phase; 50 Hz;

chiller: 400 VAC ± 10 %, 3 phases; 50 Hz

other ratings on request

Maximum power

approx. 700 W consumption

chiller: approx. 1200 W

Protection class IP 54 (NEMA 13)

Ambient conditions

operation 5 to 35°C (41 to 95°F) **Ambient temperature**

storage 0 to 60°C (32 to 140°F)

operation 5 to 80% relative humidity, **Ambient humidity**

non-corrosive

storage 5 to 85 % relative humidity,

non-corrosive

Sample

filtered 10 µm, Quality

moisture content max. 550 ppm

(≤ 37 cSt at inlet temperature)

Consumption 20 to 40 l/h

Pressure at inlet 1 to 4 bar (14.5 to 58 psi)

Temperature at inlet ≥ 15°C (59°F)

Utilities

Instrument air

Consumption

Purae 8 Nm3/h while purging (~12 min)

Operation approx. 2.3 Nm3/h

Pressure at inlet 3 to 7 bar (43.5 to 101.5 psi)

dew point \leq -40°C (-40°F) Quality

humidity class 2 or better acc. to ISO 8573.1

Coolant FKS-KWS with "Temper -55" integrated Signal outputs and inputs

Analog outputs Cold Filter Plugging Point

(others on request)

Digital outputs Alarm, Ready / Valid

Digital inputs Stream Selection, Validation Request, Reset

Electrical data of signal outputs and inputs

Analog outputs max. 8 (4 to 20 mA; 1000 Ω)

active isolated on request

Analog intputs 4 to 20 mA: 160 Ω **Digital outputs** 24 VDC; max. 0.5 A **Digital inputs** high: 15 to 28 VDC low: 0 to 4 VDC

Auxiliary power

supply output 24 VDC; max. 0.8 A

Control unit

Central control unit Industrial PC

Operating system Windows Embedded Standard 7®

Control software PACS

User interfaces

Display TFT display with touch function

1024 x 768 pixel

Keyboard virtual keyboard, controlled via

TFT display with touch function

Connections

Tube fittings Swagelok® 6 mm/12 mm/18 mm

other fittings on request

Vent/Drain open to atmosphere

Weight and dimensions

Weight approx. 400 kg

Dimensions (W x H x D) approx. 1140 x 2030 x 710 mm **Space requirements** right: 500 mm / left: 500 mm

Optional interfaces

Analog outputs on request

MODBUS interface

MODBUS/RTU via RS485 or RS422 or FOC is, MODBUS/TCP via FOC is

Remote access via Ethernet (VDSL or FOC is)

Important notice CFPP-4 is subject to continuous product improvement, specifications are preliminary and may be subject to change without notice. If your technical data do not comply with existing data, please contact us for technical clarification.
